

CapLock™

Fixed Indexed Annuity

*Clarity You Can
Count On*

A Cap You Can Count On — Locked for the Surrender Charge Period You Select

The Oceanview CapLock Fixed Indexed Annuity provides a clear, straightforward way to plan for long-term accumulation with confidence.

For the following three **Guaranteed Cap Rate Index Strategies**, the cap rate is declared **once at policy issue** and **remains locked for your full surrender charge period — 5 or 7 years**:

- ☀ **S&P 500 Annual Point-to-Point with Cap Rate Guarantee**
- ☀ **Nasdaq-100[®] Annual Point-to-Point with Cap Rate Guarantee**
- ☀ **Russell-2000[®] Annual Point-to-Point with Cap Rate Guarantee**

That means **no annual re-declarations, no mid-term adjustments, and no unexpected changes** to the declared cap rate — just clear expectations and consistent performance parameters for long-term planning.

Your cap rate remains the same for your entire selected Surrender Charge Period, providing predictability in how interest is credited.

That's the value of the CapLock design.

How CapLock Works

CapLock combines the potential for index-linked growth with the **principal protection** of a fixed annuity.

How interest is credited:

- ☀ Interest, if any, is credited annually based on index performance, **up to your locked cap rate**.
- ☀ If the index return is negative, no interest is credited for that year — but **your principal does not decline due to market performance**.

Key Features

- ☀ **Cap Rate Declared Once** — Guaranteed for your entire 5- or 7-year surrender charge period
- ☀ **Market-Linked Growth Potential** — Through leading indices
- ☀ **Principal Protection** — Your account value is not reduced from market downturns
- ☀ **No Direct Equity Exposure** — Index performance is used solely to determine credited interest and does not represent direct market participation

Available Terms

**Guaranteed Cap Rate Strategies are available only at the time of application.*

If you reallocate out of a Guaranteed Cap Rate Strategy, you cannot reallocate back into any Guaranteed Cap Rate Strategy.

Interest, if any, is credited based on index performance (excluding dividends) and subject to the applicable cap or participation rate.

Accessing Funds

Free Partial Withdrawals

Beginning after the first contract year, you may withdraw up to **10% of your account value** (as of the most recent contract anniversary) each year **without surrender charges or MVA**.

Minimum Withdrawal Amount: \$250.

Market Value Adjustment (MVA)

An MVA may increase or decrease the value of withdrawals exceeding the free withdrawal allowance, based on market interest rate changes since issue.

The MVA applies only **during the surrender charge period**.

(Not applicable in California)

Required Minimum Distributions

RMDs from qualified contracts are available after the first contract year and **are not subject to surrender charges or MVA**, even if they exceed 10%.

Protection Features

Included Waivers (No Additional Charge)

- ☀ **Nursing Home Confinement Waiver** – Provides access to funds without surrender charges if confined to a qualifying facility for 90 consecutive days (after year one).
- ☀ **Terminal Illness Waiver** – Provides access to funds if diagnosed with a terminal illness (after year one).

(Available where approved; see contract for details.)

Surrender Charge Schedule

Contract Year	1	2	3	4	5	6	7
5-Year	9%	8%	7%	6%	5%		
7-Year	9%	8%	7%	6%	5%	4%	3%

(California versions are non-MVA and may include slightly adjusted charge schedules. Surrender charges vary by state.)

After the surrender charge period ends, **no surrender charges or MVA apply.**

End of Surrender Charge Period Options

When the Surrender Charge Period ends, clients may:

- ☀ Reallocate among available crediting strategies,
- ☀ Withdraw the full account value without surrender charges or MVA
- ☀ Elect an income option.

If your contract continues beyond the surrender charge period, any funds in **Guaranteed Cap Strategies** will automatically transition to a **non-guaranteed cap strategy**, subject to the declared rates then in effect.

Death Benefit & Spousal Continuation

If the owner or annuitant dies before annuitization, beneficiaries receive the **full contract value**, free from surrender charges and MVA.

A **spousal continuation** provision allows a surviving spouse to continue the contract with full tax-deferred status (when listed as the sole primary beneficiary).

Frequently Asked Questions *About CapLock*

Q: How is CapLock different from traditional FIAs?

Traditional FIAs generally re-declare their cap rates each year. CapLock provides greater predictability by **locking your cap rate at issue for the full surrender charge period.**

Q: Are returns guaranteed?

No. The cap rate is guaranteed to remain the same, but credited interest depends on index performance. Poor index performance may result in zero interest for a period — but your principal will not decline.

Q: When can I choose a Guaranteed Cap Rate Strategy?

Only at the time of application.

If you reallocate out of a Guaranteed Cap Strategy, you cannot re-enter one later.

Q: What happens at the end of my surrender charge period?

At the end of the Surrender Charge Period, clients can reallocate among available crediting strategies or fully withdraw their account value without surrender charges or MVA.

If your contract continues without action, Guaranteed Cap Strategy allocations transition to non-guaranteed cap strategies at then-current declared rates.

Q: Can I change my allocations during the surrender charge period?

Yes — but **only among non-guaranteed strategies.**

Guaranteed Cap Rate Strategies are available only at issue and cannot be re-entered once exited.

About Fixed Indexed Annuities

Q: Is my money invested in the market?

No. Index performance is a reference for interest crediting only and does not involve direct market participation or dividends. Interest, if any, is credited based on index performance and subject to a cap or participation rate.

Q: Can my contract lose value due to market declines?

No. Principal and credited interest are protected from market losses.

Q: How is interest determined?

Interest is credited at the end of each crediting period based on index results and the cap or participation rate associated with your chosen strategy. Interest crediting formulas vary by index strategy and are described in the contract.

Q: What liquidity options are available?

After year one, up to 10% of your account value may be withdrawn annually without surrender charges or MVA. RMDs are also not subject to surrender charges or MVA.

Q: What is a Market Value Adjustment (MVA)?

An adjustment applied to withdrawals over the free allowance during the surrender charge period and is based on interest rate changes. (Not applicable in California). It may either increase or decrease the surrender value.

Q: Are there any annual fees?

No explicit annual policy or administrative fees. Surrender charges and MVA apply only to withdrawals above the free allowance (generally 10% after the first year) during the surrender charge period.

Q: What happens if the owner passes away?

Beneficiaries receive the full contract value without surrender charges or MVA.

Q: Is CapLock available in all states?

CapLock is available in most states but **not in New York or Vermont.**

California versions are non-MVA.
